

Hypervolt For Clinic Use

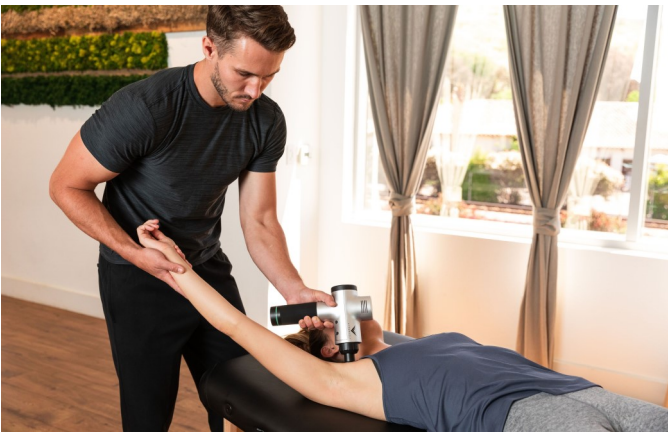

HYPERICE®

Clinic Use

Clinic Use

Benefits To Your Clinic

A growing no of clinics throughout Ireland have taken on Hypervolt to aid with their treatment protocols.

- Warm up the muscles at the beginning of the treatment session.
- Loosen and relax muscles that are overly tight, prior to other treatments e.g. dry needling.
- Proved great for patients with myofascial pain during lockdown when access to physio reduced.
- Excellent in the neck & trap area to treat tight muscles. Patients love it.
- Save your hands and thumbs with the deeper muscle areas like the glutes, calves, hamstrings etc.
- Helps provide foot pain relief for runners or patients who suffer from Plantar Fasciitis.
- Limit hands on treatment during the current Covid-19 concerns. Hypervolt can be administered through the clothes.
- Heads can be easily wiped down and disinfected between treatments.

Reseller Opportunities

Many clinics in the US and Europe supply Hypervolt and other Hyperice products to their patients & athletes. Becoming popular here now also.

- We offer a Resellers trade price to Physio clinics with a very attractive margin.
- Additional revenue stream for your clinic.
- No stock holding risks.
- Promotes recovery with your patients and better outcomes.
- Athletes use for warm up before training & games and recovery afterwards.
- Please email us to sales@sportsphysio.ie for details of the Reseller agreement.
