Pre-habilitation

We are based in Thurles and have over 12 years experience providing Medical & Sports Performance requirements to the majority of teams at Club, Provincial & International level.

Our dedicated team work closely with the Medical, Physiotherapy, Strength & Conditioning, Sports Science personnel to provide a prompt service & technical support to meet the teams needs.

Research & Development

We continuously research the market to ensure we have the latest & best products available, backed by evidence based research.

We work closely with the Universities, colleges and Industry in this regard.

Prompt Delivery

We hold large stocks to ensure prompt delivery.

Next day delivery in majority of cases.

Excellent courier network including International 2 day delivery service

Product Quality

We work closely with the leading Industry suppliers to ensure we offer the best Quality Products & Equipment to our customers.

We work only with reputable suppliers to ensure consistency of product Quality

Experience & Service

We have 12 years Experience providing Medical & Performance Supplies & Equipment to many of the Top teams and Associations

Nominated Medical & Performance Supplier to all FAI International Teams

Sports Physio Supplies provide a very reliable service and are the nominated Medical Supplier to the Football Association of Ireland for all International teams

Kit out of the Physio & Rehab facility at the Irish Institute of Sport, Abbotstown

Kit out of the Cork GAA Gym at Pairc ui Chaoimh

Working with the Top teams & Associations

Trusted to represent the Top Brands in the Irish Market

"Sports Physio & Performance has been our partner and official distributor within Ireland for almost two years, helping to bring NormaTec's technology to professional and amateur clubs, sports medicine and fitness facilities, and individual athletes of all types. They have a great understanding of the technology and how NormaTec can benefit athletes in their training, recovery, and performance in their sport"

"DJO global are proud to work with Sports Physio Supplies to provide high quality equipment & training to physiotherapists & Teams in Ireland"

We work closely with Perform Better in the US as their Irish Distributor providing their top Quality products to Irish customers

Centrally Located for Local prompt Support

Visit us in Thurles to see our Demo rooms. Get Ideas on Room Layouts and get to try out the Equipment

Over 12 years we have built up great relationships with many of the Worlds leading suppliers of Sports Medicine & Performance products and equipment. We work closely and meet regularly with them to ensure our customers have access to the newest and latest products in what is now a very specialised area. Here are some of the brands below that we work with.

Strength Testing

210-292 Push / Pull Dynamometer 113kg €695 + Vat
Simple, easy to use, objectively measures push, pull & lift forces. Dynamometer comes with three push pads (padded curved, padded straight, and 1cm² circular), one pull hook & one snap lock hook. Sold with cushioned carry case & muscle test manual. One-year warranty. Analogue (dial) readout. 113kg/249lbs load capacity.

Accessories below available to optimise testing.

- WalSlide for a fixed point of resistance.
- Lift platform to perform lifting evaluation or measurement of the hamstring & back muscles.
- Dual Grip handle when measuring larger forces.

**45 kg Model/
113 kg Model**

BASELINE EVALUATION INSTRUMENTS

Push / Pull Dynamometer Optional Accessories

210-291 Cando WalSlide:
€295 + VAT
Can be used as fixed and mounted point of resistance for muscle testing eliminating error to due tester strength with the push pull. The use of this attachment can allow for increased standardization and increasing reliability.

Baseline Lifting Platform & Chain:
€160 + VAT
Can be used as fixed and mounted point of resistance for muscle testing.

Ideal when testing the musculature in the hamstrings and back.

210-296 Baseline MMT Dual-Grip:
€63.50 + VAT
The Baseline® push-pull dynamometer push and pull dual-grip accessory can be used to give the tester the ability to better resist the force applied by the patient when testing. The dual grip accessory can also be used to perform pulling muscles tests.

COMMANDER
ECHO

150-317 Commander Muscle ECHO Tester €1350 + VAT (Please call for offers)

Quickly and accurately quantify muscle strength and identify areas of weakness with the Echo Wireless Muscle Tester and Commander Echo Console.

Features

Provides a wealth of information to assist you with planning treatment/rehab, evaluating progress, managing cases and rating impairment. Compact dynamometer fits easily in your hand Records, stores and analyses up to 40 bilateral tests with up to four repetitions per side.

Calculates bilateral strength deficits for objective side-to-side comparisons

Axis Compensation circuitry guarantees 99% accuracy across entire test pad.

Commander consoles automatically record and store data, display test results, compute statistics and more.

Measures up to 150 pounds for very strong performers

Automatically records peak force and calculates coefficient of variation (CV) and bilateral strength deficits

Software Options

The Commander Downloader package enables you to create quick but meaningful reports from the data that you collected with your Commander Evaluation Instruments with the click of a button.

150-503 ErgoFET™ €1395 + VAT (Please call for offers)

Digital force gauge designed for Ergonomic and Engineering Applications. Measures Push & Pull Forces. 300 lb Force Load Capacity. Easy To Read LCD Displays Show Peak Force and Elapsed Time.

Low and High Threshold Settings Provide Expanded Sensitivity. Available FET Data Collection Software Automatically Tracks and Analyses Test Data

Specifications:

Selectable units of measure: pounds (lbs.), Newtons (N), or kilogram-force (kgf) Accuracy within 1% of reading

Two threshold settings for muscle testing: Low Threshold – 0.8 lb. to 300 lbs. in 0.1 lb. increments and High Threshold – 3.0 lbs. to 300 lbs. in 0.1 lb. increments

Attachments

Push attachments include: flat pad, curved pad, and digit pad.

Pull attachments include: open end stationary hook and snap hook, 16 inch strap with D rings, one hand handle, and 4 inch extension post; wall pack power supply.

Software Options

This digital force gauge program is designed for research and education applications. The program simultaneously captures raw test data while displaying a real-time graph of the data.

Brower TCI Timing Gates

The new Brower TCI Timing system is a single beam infrared signal timing gate used to record sprint times. The TCI Smart Start has a keyboard to enter the start number and follow the athlete during training. The Smart Start can be used with a microphone or by using the mechanical switches. The system records the time lapse between the smart start sensor and the Brower TCI gate to give split times. The more gates you add the more splits times you can record.

The NEW Brower TCI Timing System is an accurate mobile, wireless Timing System. All systems are Smart ready and can be purchased with or without the Smartphone interface Timer that allows Bluetooth connectivity and is required to access the Brower Mobile App.

SKU	Product	€ Price ex VAT
210-199	Brower TCI Standard system	1195.00

€14.90 +VAT
Large digit display, clip for easy belt attachment

130-408 4 Digit Interval Timer
€195 + VAT

Time of day can be displayed when timer is not in use.
Stopwatch format displays 1/10 second to 1/100 second
Counts up and counts down as well as keeps resting times
Timers can be set to count the time of work (up to 99.59 m)

210-118 Basic Stopwatch
€9.90+VAT
with three functions.

Jump Testing

210-192 ChronoJump System €250 + VAT

ChronoJump is a complete multi-platform system for measurement, management and statistics of jump time events (contact time, flight time), and other actions. ChronoJump is an open hardware, free software complete system.

Single jumps: Free jump, SJ, SJ (weight), CMJ, CMJ (weight), ABK, DJ (arms), DJ (no-arms), Rocket, Take Off, Take Off (weight).

Multijumps: RJ (j), RJ (t), Unlimited, Hexagon, Triple jump, Multijumps have feedback to help in control the test, You can also define your own jumps, Results: Jump height, flight time, contact time (depending on test).

Products needed: ChronoJump software, Chronopic microcontroller, Contact platform (recommended Din-A2 size).

210-308 Vertec

Consists of a solid metal base, telescoping upright and vanes spaced 1/2 " apart that rotate when touched for easy measurement.

Use it to accurately measure vertical jump height when: Jumping off 2 feet from a standing position directly underneath.

Jumping off a single foot from a moving start.

It allows the coach, trainer or therapist to determine how the subject is progressing.

Measures how effectively the person converts horizontal movement to vertical lift.

210-185 Just Jump Mat Standard
210-186 Just Jump Mat Plyometric version

The Just Jump system is an excellent jump mat that is being used extensively in Performance Sport. Hand held computer displays height and hang time for one jump, ground contact time for one jump and average height & flight time for four jumps. It can also be used for sprint time - the system is started by an audible sound & the subject runs to the mat & timer is stopped when the athlete touches the mat.

Plyometric version also measures drop jumps landing either on or off the mat

Computes foot quickness (shuttle runs and dashes) and explosive leg power rating. Records 60 jumps, then averages heights, contact times and leg power for first and last 15 jumps, in addition to a fatigue factor rating. (PLYOMETRIC version only) Just Jump measure with an accuracy of +/- 1/2" from 5 - 59 inches. Mat 27" x 27"

210-309 Push Band 2.0 with Bar Sleeve €349 + Vat
(Jump Testing Waist Band Additional €75 + Vat)

The Push Band is a wireless wearable device that measures movement velocity via the use of a 3D accelerometer and a 3D Gyroscope.

If you're interested in measuring your athlete's jump heights or testing their reactive strength, the Jump Testing Package is for you!

Save time by eliminating the need for calibration or tedious equipment set ups. Securely attaching the PUSH Band to your athlete's waist with a PUSH Waist Belt is the easiest and most accurate way to instantly measure jump data.

Polar Team APP - FREE download

Polar Team is an application that shows accurate real-time heart rates of your team players on screen. With objective heart rate data, you can give smarter guidance to your players. You can see who is tiring, who needs to work on their fitness, and who may have energy left in the tank. Allows up to 40 players to be shown on screen. Each player wears a H7 wear link which transmits a Bluetooth signal back to the iPad with a 60-70metre range

At the end of the training session it will email the coach all the stats for every player and email each player taking part there individual stats like calories burned, average heart rate, maximum heart rate, time in each sports zone, length of session etc.

Hook up your fitness app or training device with Polar H10 and get live, accurate heart rate while you train. You can use Polar H10 with a number of Polar products and compatible gym equipment. Compatible with dozens of leading fitness apps, including Polar Beat & Polar Team Compatible with iPhone 4S and later, an with selected Android devices including Samsung Galaxy S3 and S4 using Android 4.3 or later. Check all compatible devices on www.polar.com

Transfers heart rate while swimming with products which support 5 kHz transmission*

Juvenile Club/School Development Pack

The 'Sports Performance Kit' is used from youth up to adult. However going back further to the Development of the Child its very important to develop the Rudimentary & Fundamental Movements. Much of this can be done without any or minimal equipment and we've developed a handy Development Pack ideally suited to primary schools, underage clubs etc. and will help the child develop these movement skills. This is our recommended Development Pack but can be customised to suit your schools or teams needs. You may also have recommendations on other items you would like and we welcome these of course & will do our best to source these solutions.

The Fundamental Movement Development Pack is designed to help

- ◆ **Catching, Throwing & Kicking,**
- ◆ **Agility, Balance, Coordination (ABC of movement)**
- ◆ **Jumping, Landing, Rolling, Crawling (Rudimentary movement)**
- ◆ **Speed, Agility, Quickness (SAQ)**

**Fundamental Movement

130-226 Viper belt & 8 foot Bungee:
€85 + VAT.

130-225 Viper belt & 25 foot Bungee:
€109 + VAT.

130-236 Viper belt without bungee:
€45 + VAT.

Premium speed belt system that improves sprinting, leaping and directional quickness.

Arguably the best Quality Belt available. Well padded, extremely strong and robust. The main advantage is the additional rotating ring on the belt which can rotate around the belt almost 360 degrees.

130-235 Quick Release Leash €29 + VAT

The Quick Release Leash is a heavy-duty leash that combines fixed resistance with overload release for explosive speed training.

3m long strap with a handle—trainer can provide a strong resistance to the athlete before pulling the release clip, tricking the nervous system into commanding the muscles to shift gears more quickly.

Use the Quick Release leash along with the Workhorse, 360 Belt, or any of our other belts and harnesses.

130-522 Power Speed Resistor
€15 + VAT

Resisted sprinting can't be beaten as the easiest & most inexpensive way to develop explosive speed.

Excellent for explosive speed and anaerobic fitness workouts. Easy to use, lightweight, comfortable & hardwearing the

Power Speed Resistor will quickly become your favourite training tool.

130-523 The Trainer®: €199 + VAT

The Trainer is the only training resistance training device that allows for easy dial changes in resistance level (0-600 units).

Features of The Trainer:

Provides fixed, steady resistance for forward, backward and lateral movement. Safe- Resistance ends when you stop. Great for rehabilitating lower extremity injuries, as well as improving acceleration and explosiveness. Portable and easy to use – slip on the padded waist belt, hook to the cord and attach The Trainer to a secure object. Set resistance level and begin training.

Includes: The Trainer, two belts, 40-yard cord, carrying case, and manual.

130-230 The Workhorse Harness
€79 + VAT

An all-in-one harness. From shuffles, bounds, sprints, drops, backpedals, swings etc., it puts resistance or over-speed in every movement without altering the movements natural mechanics

Has 2 "Saturn Rings" which rotate nearly 360 around the waist. These you to anchor from 2 different points while working drills that require multiple changes of direction.

140-347 Hammer Head Anchor Gym H2
€79 + VAT

A wall mounted system for anchoring resistance bands and straps. Mount the gym in any configuration for hundreds of exercise options. Made of steel and capable of supporting up to 300 lbs.

Each hook has a T-bar and curved shape for bands to be pulled from multiple angles safely. Hammer Head Anchor Gym H2 Units have 2 hooks that extend 3" from the wall – each hook measures 11 1/2" high x 2 1/2" wide. Hardware included for mounting to wood studs

Performance Training

Velocity Based Training

210-309 **Push Band 2.0 with Bar Sleeve** €349 + Vat
(Jump Testing Waist Band €75 + Vat)
The Push Band is a wireless wearable device that measures movement velocity via the use of a 3D accelerometer and a 3D Gyroscope.

The Push Band can be used to collect key performance data for over 250 exercises, all at the push of a button. The Push Band allows coaches instantly monitor fatigue and readiness by being able to identify reductions in movement velocity or power output (Wattage).

Increase buy-in by providing purposeful and actionable training feedback. Whether it's for long-term trend analysis or rep-by-rep coaching cues, data collected by PUSH will make a difference.

If you're interested in measuring your athlete's jump heights or testing their reactive strength, the Jump Testing Package is for you!

Save time by eliminating the need for calibration or tedious equipment set ups. Securely attaching the PUSH Band to your athlete's waist with a PUSH Waist Belt is the easiest and most accurate way to instantly measure jump data.

PUSH Band 2.0 Bar Sleeve and Waist Belt available in stock

Body Weight Training

130-406 **JUNGLE GYM XT** €95+VAT
Versatile, portable, adjustable device for bodyweight exercises.

130-192 **Push Up stands**
€11.90 + VAT
Sturdy, lightweight snap together design made from hi-strength polypropylene.

130-191 **Ab Wheel Pro** €19.90 + VAT
A serious abdominal training tool—two wheel design offers improved stability plus the option of single or both arm usage, whilst the addition of a brake that is operated by simply twisting the wrist helps to prevent over stretching and injury

SportsPhysio
Performance

140-283 **Valslides** €32.90 + VAT (pair)
130-303 **Valslide Booties**—optional €5 + VAT (pair)
130-376 **Slide Pads** (blue disk) €12.90 + VAT (pair)

Discs that provide an unstable training surface that allows you to simulate many Slideboard exercises.

Turns carpet & floors into an unstable training surface. Use them to target multiple body parts such as your legs, inner thighs, and glutes all at the same time. Use them to stretch and tone your shoulders, chest & back.

Rehab & Prehab

Pilates

C2 Pro Reformer

- The C2 Pro is our most popular. Ideally suited if planning to do studio based classes.
- Doesn't take up a lot of space per unit. Can be stacked upright when not in use & easy to move around.
- Choice of the Universal sitting box or the framed flat pack sitting box. Jump board is also a popular accessory.
- Leg extensions rise the platform 42cm off the ground so good for certain patient as they don't need to get down too low on the ground

A2RII Pilates Reformer

- The A2RII is the rolls Royce version and more commonly order for one to one Clinic Rehab or in High Performance Sport, rather than a studio environment where typically multiple reformers would be in use.
- Has a larger footprint than the C2 Pro.
- Again comes with Leg extension options in 3 different heights.
- Choice of sitting box as with the C2 Pro and its own Jump board option.

Bernard Brogan @bernardbrogan
Tks to the guys @sportsphysioirl for rehab kit for club champo #injuryprevention #rehab

"I used the sports performance bag in 2015 and it played a huge part in my rehabilitation and warm up sessions for gym & outdoor sessions. The bag fits nicely into my gear bag and keeps all the items of equipment in one bag. Activation of muscles is important before training and gym sessions to prevent injury. Pre-hab sessions are completed on non - training days and are vital for sport. The performance bag has everything to assist with any program"

Performance Kits - Mobility & Injury Prevention

Evidence Based Research

There's much evidence pointing to the benefits of Injury Prevention, improving mobility. Here are just 3 such reports.

Frequently Asked Questions

Q. Can I get my Team Logo on the Performance Kit?

A. Yes absolutely we can add the logo also. It's a very professional finish and adds great value and ownership to the bags. See few examples across.

Q. The team have many costs. Budget isn't available to provide these kits !

A. We recommend that the cost of these kits be passed on in full or partially to the parents where it involves younger Development Age squads. The special squad price is 30/40% less than purchasing the items individually. The Kit will last the player as he's/her career develops. It helps them avoid injury and improve their performance and is a long term investment for just €20. The feedback from team's who explain these benefits to the parents, is unanimous support from the parents to fund this cost.

Q. Are performance kits for more advanced player's and athletes?

A. The contents of these kits means that teams, clubs, players of all levels can benefit massively by improving flexibility, mobility and strength. The contents of the kits are extremely versatile and can be used to meet the varying needs of the user.

Q. Can we change the kit contents?

A. Of course. The kit can be customised totally for your teams needs. See above for ideas on other items that can be included in the kits.

Rehab & Prehab

Who's using Performance Kits ?

Performance Kits are hugely popular from Schools and Club teams, right through Development and Academy squads and with Adult teams at County, provincial and International level.

They are used across all sports and the feedback is fantastic from all the teams using them. As squad members are added to teams top up kits can be provided. To get the most out of the kits the overwhelming feedback is to have the kits mandatory for all members and that the contents can be worked in to the training session and then to use at home in between sessions.

The bags are extremely robust and the kit contents can be added to year on year.

Development Squads

Cathal Cregg, Head Strength & Conditioning Officer, Connacht GAA

As Head Strength & Conditioning Officer at Connacht GAA I recommend our approved supplier "SPORTS PHYSIO SUPPLIES". When dealing with county academy squads reliability and speed of service is of the utmost importance, we have found that "SPORTS PHYSIO SUPPLIES" work to the highest degree of professionalism and quality.

We have been supplying our squads with Sports Performance Kit as part of their prehab, warm up and strength training sessions. The kits have played a huge part in helping us implement our programs across the various counties. The kits we use include foam roller, mini bands, Swiss ball and lengths of TheraBand. All of this coming in a small convenient compact bag makes it a vitally important part of our players training and match day kit. The compact kit allows players to carry equipment around in their gear bag.

Adult Squads

Ciaran Sloan - Down GAA Senior Strength & Conditioning Coach

The performance kits are very beneficial for use during prehab and activation prior to gym & pitch sessions. The performance kits can be used at home & when travelling, which allows players to undertake their own individual prep.

The sliders & mini bands can be used for exercise variation (for example knee flexion posterior chain work), mobilisation and muscle recruitment around the pelvic girdle.

Universities & Schools

Jimmy Condon - manager of U16 St Coleman's Fermoy

The St. Colmans College Dean Ryan squad were delighted to use performance kits from Sports Physio Supplies.

The quality if the equipment was of a very high standard and it allowed the players to work on their flexibility, strength and conditioning during holidays and weekends. The compact nature of the product meant that the players found it very easy to store and transport the equipment.

They really enjoyed using the products. It definitely helped the players during a very successful year for themselves and the college.

Blood Flow Restriction Training

210-270 Occlusion Cuff €130 + VAT

Blood flow restriction/ occlusion training is a training method involving the use of cuffs or wraps placed around a limb during exercise, to maintain arterial inflow to the muscle while preventing/ reducing venous return.

One of the most optimal situations to use blood flow occlusion training is early stage rehab. This where a patient/ athlete is in a phase of injury rehabilitation where they cannot perform exercises of above 60% 1rm.

Blood flow occlusion training allows patients/ athletes to perform low load resistance training allowing them to avoid as much strength loss and muscle atrophy in the early phases of rehabilitation.

Studies have shown benefits post such injuries as ACL Reconstruction, Knee Arthroscopy, osteochondral fracture as well as other lower limb injuries.

Recovery

TRAIN HARDER RECOVER FASTER PERFORM BETTER

NormaTec is the leader in rapid recovery—our systems give a competitive edge to the world's elite athletes, coaches, and trainers. Our goal is to establish recovery as an integral part of every athlete's training, and we feel NormaTec systems are the best way to accomplish that.

The NormaTec PULSE Recovery Systems are dynamic compression devices designed for recovery and rehab. All of our systems use NormaTec's patented PULSE technology to help athletes recover faster between trainings and after performance.

Our systems include a control unit and attachments which go on the legs, arms, or hips. They use compressed air to massage your limbs, mobilize fluid, and speed recovery with our patented NormaTec Pulse Massage Pattern. When you use our systems, you will first experience a pre-inflate cycle, during which the connected attachments are molded to your exact body shape. The session will then begin by compressing your feet, hands, or upper quad (depending on which attachment you are using). Similar to the kneading and stroking done during a massage, each segment of the attachment will first compress in a pulsing manner and then release. This will repeat for each segment of the attachment as the compression pattern works its way up your limb.

Why choose NormaTec?

- **Speeds up Recovery**
- **Increases circulation**
- **Reduces pain & inflammation**
- **Patented technology proven results**
- **Backed by Research studies**
- **Relied on by 97% of pro teams in the USA**

Recovery— GAA Teams using NormaTec

I've been using the NormaTec boots regularly over the past two seasons.

I find them great immediately after games & the following day to help remove any stiffness or soreness and freshen the legs before the next training session.

I also like to use them in the days prior to a game as a good preparation.

Pádraic Maher—Tipperary Senior Hurling Captain

TJ Reid @_tjreid · Mar 12

Thanks to @Sportsphysioirl for the normatec compression boot for recovery, badly needed after a tough game in thurles last night, #recovery

Limerick GAA All Ireland Senior Hurling Champions 2018

SportsPhysioSupplies @Sportsphysioirl · Mar 7

@ColinFennelly using our Normatec Pulse recovery boot after a tough game against cork at the weekend. #recovery #normatec

Many GAA teams use NormaTec now as part of their recovery protocols. Here are just a few

Recovery– Irish & International Athletes

Aileen Flynn – Triathlete (World Championships Ironman Kona 2015 & 2017) & Chartered Physio.

As a triathlete I regularly train twice a day. This can result in significant muscle fatigue and soreness. Since using Normatec as part of my recovery routine I've noticed that I can take on subsequent sessions with more ease and fresher legs. I consider Normatec a key element in my training program and attribute part of my successful season in 2017 to timely use of my recovery boots.

As a chartered Physiotherapist I see first hand in athletes bodies what can result from insufficient recovery. Elevating the legs in a recumbent position certainly helps with recovery and in my experience the added massage effect of Normatec seems to assist in reducing my muscle soreness. My legs always feel a few years younger after some recovery time in my Normatec boots.

Recovery– Research Studies & Order Options

BACKED BY RESEARCH

DYNAMIC COMPRESSION ENHANCES PRESSURE-TO-PAIN THRESHOLD IN ELITE ATHLETE RECOVERY: EXPLORATORY STUDY.

Journal of Strength & Conditioning Research 2015 May; 29(5):1263-72

"The purpose of this study was to assess peristaltic pulse dynamic compression (PPDC) in reducing short-term pressure-to-pain threshold (PPT) among Olympic Training Center athletes after morning training. [...] We conclude that PPDC is a promising means of accelerating and enhancing recovery after the normal aggressive training that occurs in Olympic and aspiring Olympic athletes." —view article on pubmed.

PERISTALTIC PULSE COMPRESSION OF THE LOWER EXTREMITY ENHANCES FLEXIBILITY.

Journal of Strength & Conditioning Research 2014 Apr; 28(4):1058-64

"This study investigated the effects of peristaltic pulse dynamic compression (PPDC) on range-of-motion (ROM) changes in forward splits. [...] PPDC provides a means of rapidly enhancing acute ROM requiring less discomfort and time." —view article on pubmed.

PERISTALTIC PULSE COMPRESSION UPREGULATES PGC-1 α AND ENOS IN HUMAN MUSCLE TISSUE.

Experimental Physiology 2015 May 15

"We investigated whether a single 60 min bout of whole-leg, lower pressure external pneumatic compression (EPC) altered select vascular, metabolic, antioxidant and inflammation-related mRNAs. [...] An acute bout of EPC transiently upregulates PGC-1 α mRNA, while also upregulating eNOS protein and NOx concentrations in vastus lateralis biopsy samples" —view article on pubmed.

PERIPHERAL CONDUIT AND RESISTANCE ARTERY FUNCTION ARE IMPROVED FOLLOWING PERISTALTIC PULSE COMPRESSION.

European Journal of Applied Physiology 2015 May 16

"The purpose of this study was to determine the acute effects of a single bout of peristaltic pulse EPC on peripheral conduit and resistance artery function. [...] Acutely, whole limb, lower pressure EPC improves conduit artery endothelial function systemically, but only improves RH blood flow locally (i.e., compressed limbs)." —view article on pubmed.

Designed for in session Compression.

Ultralight Socks

€44.90 + VAT

Designed for in and or post session Compression.

CEP Ultralight Socks & Sleeves Sizing Chart Calf Circumference (cm)

Size	Women	Men
II	25-31	-
III	32-38	32-38
IV	39-44	39-44
V	-	45-50

Measure the circumference around the fullest part of your calf.

We chose CEP as our Compression partner as they are part of the world renowned MEDI compression family and arguably the best Sports Compression wear on the market.

Also based on recommendations from Physios and Athletes who use the range and advised us to stock them.

medi

CEP BENEFITS

- MORE ENERGY, GREATER ENDURANCE AND ENHANCED PERFORMANCE
- INJURY PREVENTION
- MUSCLE AND JOINT STABILIZATION
- INCREASED COORDINATION
- IMPROVED RECOVERY

BACKGROUND INFORMATION

medi compression technology

- Manufactured using a circular knitting method
- Special compression thread
- Thread wraps around approx. 400 times from heel to top band
- Thread wrapped with a predefined tension
- The seal that guarantees quality

GET CLONED.

Custom Fit Compression for Ultrafast Recovery

CLONETECH Compression Tights

CEP now exclusively offers tailor made full compression tights. CEP understands that for the most effective recovery; your compression needs to be custom fitted to your measurements.

Just as everyone is different so is the measurements in your legs, calves, quads & waist; so a tailor made fit will give you maximum recovery!

The Unique Compression Profile & Full Length to Foot; promotes more blood circulation, reduces muscle tears, clears out toxins as well as help prevent injuries

CUSTOM MADE TO FAST REST Individual CEP Recovery Clonetech Tights are made to measure. Because only what is right, can work properly. The anatomically perfect shape adapts ideally to the body, Guarantees pleasant wearing comfort and ensures maximum physical recovery in a minimum of time.

BEST COMPRESSION Compression is not the same as compression. Compression thread is knitted in every stitch row - for millimeter-accurate pressure control. The compression at the ankle is strongest and decreases along the leg upwards. We call this unique technology "medi compression".

COMPRESSION ON THE FOOT The CEP Recovery Clonetech Tights also scores with a compressive foot section. This promotes the blood backflow and thus reduces congestion in the foot - for an even more efficient recovery after intense training loads and competitions.

INDIVIDUAL DESIGN Whether for player numbers, initials or your own personal best: The CEP Recovery Clonetech Tights can be individually printed on the lower leg and on the hip. Up to four characters in gold or silver make the tights a personal highlight.

BUND HEIGHT IN 3 VARIATIONS Depending on your taste you can choose between three waist sizes: - Low Waist (low waist) - Mid Waist (mid waist) - High Waist (high waist)

Recovery – Cold Therapy Treatments

Cold Therapy – Game Ready

The **Game Ready** System continuously circulates cold water from the control unit's ice reservoir, via a connector hose, through an inner chamber of the anatomical wrap (this chamber is located closest to the body) before returning to the ice reservoir.

As a complete loop, the cold water is refreshed through the ice before returning through the anatomical wrap, thus delivering continuous cold therapy, allowing heat to be removed from the treatment site. Simultaneously, the control unit pumps air into the separate, outer chamber of the anatomical wrap, intermittently inflating and deflating according to the pressure setting that is selected.

The compression not only assists in preventing / limiting swelling, but also conforms the Anatomical Wrap to the contours of the body. This increases the surface contact and aids the delivery of the circumferential cold therapy.

The **Game Ready** System combines **Intermittent Compression** with **Circumferential Cold Therapy** in one easy-to-use, adjustable application.

Benefits of Compression & Adjustable Cold Therapy

1. Decreases pain, muscle spasms, swelling
2. Reduces metabolic activity and cellular demand for oxygen to reduce tissue damage
3. Mimics muscle contractions, pumping oedema out of the injured area
4. Stimulates tissue healing
5. Increases blood flow and delivery of oxygen to the injury site
6. Optimizes lymphatic drainage

Rental Option also available. Please call to arrange Rental

Cold Therapy – Aircast Cryo Cuff

Aircast Bucket & Piping €59 + VAT
Choose from range of Aircast Cuffs from €69

Cold Therapy – CCT Wraps

CCT Cold Compression Therapy Wraps

A unique & patented circumferential compression therapy system incorporates a gel cold pack covered with frost free lining to allow application directly to the skin.

With the Cold Therapy combined with the adjustable inflation you can fulfil 2 of the 4 ideal treatments for soft tissue injury. RICE - R - Rest, I - Ice, C - Compression, E - Elevation. the Rest and elevation can easily be controlled by the patient.

Intermittant compression can also be achieved by giving the player/patient guidelines on how often to inflate and deflate the device

Order Code	Product Description	€ excl VAT

Recovery

180-282 Hypervolt €325 + VAT

The Hypervolt is a handheld device that applies 3 levels of powerful vibrations (with up to 3200 percussions a minute) to areas of the body.

What that translates to is a very quick and smooth action that will stimulate the tissues to help improve movement and recovery.

Helps relieve muscle soreness and stiffness
Improves range of motion
Promotes circulation
Accelerates warmup and recovery
Lightweight, easy-to-use for self-myofascial release

Technology Specifications and Features

Powerful high-torque motor featuring Quiet Glide™ technology
3 speed settings deliver up to 3200 percussions per minute
Rechargeable lithium-ion battery (Up to 3 hours of use per charge)
4 interchangeable head attachments

180-283 Hypervolt Case €49.00 + VAT

Slim and sleek, the Hypervolt Case provides lightweight protection to store and carry your Hypervolt. Custom inlay holds the Hypervolt, 4 head attachments and battery charger.

Adjustable 4 levels €65 + VAT

200-257 Pro Stretcher €34.90 + VAT

Reduce the domino effect of chain reaction injuries. Flexibility and strength are critical factors in achieving peak physical potential and in preventing and treating injuries.

Recovery—Complex

Electro - Stimulation / Rehab

Chattanooga Wireless Professional 'FUNCTIONAL REHABILITATION IN MOTION'

The **Chattanooga Wireless Professional** is today's most advanced electrotherapy unit, offering enhanced ease-of-use and convenience while saving space and time to optimize patient treatment.

Muscle intelligence technology: Offers personalized stimulation, adapted to your patient's physiology.

By introducing the smart mi-Technology in each module and offering the best in market professional programs, this device reinvents functional rehabilitation as we know it:

A combination of e-stim with active exercise allowing you to improve therapy efficiency and patient satisfaction

Wireless technology: Gives you and your patient total freedom of movement.

Remote control: Adapted to professional use with a silicon keypad which acts as a safeguard against water and gel penetration, and offers enhanced ergonomics.

Favorite programs: Direct access to your favorite programs; three clicks to start a session.

Docking station:

Offering module storage in the charging tablet and an extensible case to store electrodes and gels.

Travel facilities: For portable use, a modular system allows you to detach the charging tablet, and take it with you in a travelling case.

Remote control: Adapted to professional use with a silicon keypad which acts as a safe guard against water and gel penetration, and offers enhanced ergonomics.

Motor point pen: This useful tool together with the dedicated program helps ensure the optimal electrode placement.

**The Wireless Professional is available in 2 Options
The Standard and the Full Package (See details here)
Please call for pricing on both options**

Standard Package Programs

Rehabilitation I: 5 programs

Disuse Atrophy. Reinforcement. Prevention of Disuse Atrophy. Muscle Lesion. Motor Point

Pain relief I: 6 programs

TENS (100Hz). Freq. Modulated TENS. Pulse Width Modulated TENS. Endorphinic. Burst TENS Alternated. Decontracting

Vascular: 7 programs

Heavy Legs. Venous Insufficiency 1. Venous Insufficiency 2. Arterial Insufficiency 1. Arterial Insufficiency 2. Cramp Prevention. Capillarization

Conditioning I: 3 programs

Resistance. Strength. Active Recovery

Additional programs in the Full Package

Rehabilitation II: 12 programs

Hip prosthesis, Patellofemoral syndrome. ACL, Rotator Cuff, Lumbar Stabilisation, Cardiac Rehabilitation. Ago/Antago Atrophy, Ago/Antago Reinforcement. Atrophy (Mod. Freq.), Reinforcement (Mod. Freq.). Atrophy for Haemophiliacs. Reinforcement for Haemophiliacs

Pain relief II: 12 programs

Knee Pain. Trapezius Pain. Shoulder Pain. Fracture Pain. Cervical Pain. Thoracic Back Pain. Low Back Pain. Lumbosciatica. Lumbago. Epicondylitis. Torticollis. Arthralgia

Neurologic rehabilitation: 4 programs

Hemiplegic Foot. Spasticity. Hemiplegic Shoulder. Slow Start Neuro Rehabilitation

Aesthetic: 6 programs

Toning. Firming. Shaping. Elasticity. Calorilysis. Adipostress

Conditioning II: 12 programs

Potentiation. Endurance. Explosive Strength. Plyometry. Hypertrophy. Muscle Building. Low Back Reinforcement. Core Stabilization. Recovery Plus. Toning Massage. Relaxing Massage. Anti-Stress Massage

Recovery—Complex

Compex®

chattanooga

The 'Theta'

'FOR PROFESSIONALS WITH HIGH EXPECTATIONS'

150-305 Theta €1,390 + VAT

THETA is a 4 channels stimulators developed to treat both standard (Pain, NMES) and specific protocols in rehabilitation, especially when triggered or co-contractions are requested. Neurology (Spasticity, Hemiplegic foot, Agonist-Antagonist) or specific pathologies like Post ACL Ligamentoplasty are protocols provided by the unit

MUSCLE INTELLIGENCE™ TECHNOLOGY

4 functions on all 4 channels: Mi- Scan, Mi-Tens, Mi-Range, Mi-Action (Active session with a voluntary contraction detected by the device to start the stimulation). 2 Mi-Cables included.

2+2

Choose one programme for channel 1 and 2, and then select another programme from the 2+2 programme list for channel 3 and 4. This allows treatment of two different body parts, or two patients simultaneously, or combines NMES and TENS as one treatment.

TRIGGER FUNCTION

Start the stimulation on demand by pressing a trigger button when needed (Hemiplegic foot, spasticity...)

Manage the session time and move directly to the next phase (recovery) when needed.

MOTOR POINT PEN

Very useful tool in combination with the dedicated programme helps ensure the optimal electrode placement.

The 'Rehab'

150-272 Rehab €590 + VAT

REHAB is a 4 channels stimulator developed for PTs and Rehab Clinics requesting a standard way of use of electro stimulation. It meets all of the requirements a professional demand: pain management, treatment of vascular diseases, and muscle stimulation with basic programs.

MUSCLE INTELLIGENCE™ TECHNOLOGY

4 functions on all 4 channels: Mi- Scan, Mi-Tens, Mi-Range, Mi-Action (Active session with a voluntary contraction detected by the device to start the stimulation). 2 Mi-Cables included.

2+2

Choose one programme for channel 1 and 2, and then select another programme from the 2+2 programme list for channel 3 and 4. This allows treatment of two different body parts, or two patients simultaneously, or combines NMES and TENS as one treatment.

TRIGGER FUNCTION

Start the stimulation on demand by pressing a trigger button when needed (Hemiplegic foot, spasticity...)

SKIP

Manage the session time and move directly to the next phase (recovery) when needed.

MOTOR POINT PEN

Very useful tool in combination with the dedicated programme helps to ensure optimal electrode placement.

SportsPhysio & Performance

Website

Our e-commerce website has been very busy at www.sportsphysio.ie

We prefer the traditional way of taking your order by phone or email but now this gives you the option to order outside office hours or if you haven't time to call.

We do require you to set up a trade account when first ordering. We can also set this up for you if you just call 062-77014 or email web@sportsphysio.ie

The trade account gives the advantage of bulk pricing, duplicate orders, faster check-out etc. It also means its just qualified therapists ordering from the site

We have recently modified the site so that all professionals can order from the one trade site—to help make the purchasing experience clearer and more efficient for the user.

We continue to have our dedicated patient & athlete site where you can refer patients too if you don't want to provide them with the Rehab products from your clinic. Patient site is www.patientrehab.ie
