

# Infection Control Supplies

## COVID - 19

This is a short brochure relating to Infection Control Products that will likely be needed for consideration when Clinics and Facilities re-open.

Having a well thought out Procedure and Plan for interacting amongst staff and with patients and clients will be a big help in reducing the risk of passing on infection to the absolute minimum.

Hopefully these categories of Products and the accompanying checklist will help you with this putting a plan in place to suit your own set up. This will also hopefully help give your patient or client the confidence to return to your clinic or facility.

We have also suggested some of the manual and motorised products that might be worth consideration in future as an aid to hands on treatment and again with the view to minimising contact as much as possible. Most of these aids and devices can be wiped clean and sanitised between patients.

As always continue to call us on 062-77014 or by email to [sales@sportsphysio.ie](mailto:sales@sportsphysio.ie) if you need any advice on any of these products.

During this time, we are also endeavouring to limit our time for staff in the warehouse preparing orders. To help us in this regards we would appreciate where possible if you can please place any orders online during this time as this automates our warehouse process better and means we can limit our time there and keep risks to a minimum. If you already have an online trade account with us you can order on the link here <https://sportsphysio.ie/clinic-supplies-equipment/infection-control.html>

If you would like us to set up with an online account you can do so by clicking on the link here <https://sportsphysio.ie/apply-for-trade-account> and we will set up the Account for you.

If you'd prefer not to have an online trade account we have created a separate link here where you can do a once off order without needing a trade account <https://sportsphysio.ie/patient-athlete/infection-control-patient-athlete.html>

I have included the links for both on the email also.

We have had to put order limits on some of the stocks to try ensure there's enough to get around.

Kind Regards

Sports Physio & Performance Team

## Personal Protective Equipment (PPE) for the clinic

**190-456** Medical Face Mask (30 pack)  
EN14683 Rating class 1, Type II standard

**190-462** Medical Face Mask (50 pack)

190-464	Vinyl Gloves (100) (S,M,L)	4.90

### Glove Availability & Pricing

We are working very hard to get gloves into stock and to get them to clinics at competitive prices. We have secured stocks now at the pricing listed here. If we can improve on these prices from our sourcing we will, but manufacturers are flagging increases coming so please see the website for up to date glove pricing as we have them. Please see below on recommendations across the range of gloves we offer

### Glove Choice Suggestions & Recommendations

We have just added vinyl gloves now also so have 4 types now. Our **Nitrile gloves are Latex Free and Powder Free**. We have 2 types of **Latex gloves—Powdered version and Powder Free** version. The **Vinyl** are the most affordably priced. The Powder free versions will continue to be needed for dry needling etc. and similarly for those that take the Nitrile option for examinations etc.

Going forward in the new situation its expected that gloves will need to be worn more regularly in the clinic and even for regular assessments and interaction with the patient. Possibly the patient will be advised to wear a pair also ?, to minimise contact during the consultation and to have the best procedures in your practice. In these instances we would suggest that the vinyl gloves will be fully adequate and keep the cost down for the clinic. So maybe worth considering when planning your procedure for returning to clinic.

# Hand Hygiene

We have also suggested some of the manual and motorised products that might be worth consideration in future as an aid to hands on treatment and again with the view to minimising contact as much as possible.

The 3 Massage accessories here can be applied to the patient while they're fully clothed and minimises the contact. If using directly on the skin the surface can be cleaned between patients. Similarly the Hypervolt can offer the same advantages and more versatile to cover a wide range of applications.

## Massage Accessories

**180-110** Index Knobber  
€8.95+VAT

**180-109** Jack Knobber  
€8.95+VAT

**130-518** MRT Tool  
€59+VAT

## HYPERVOLT

**180-282** HyperVolt €325 + VAT **10% OFF €292 + VAT**

The Hypervolt is a handheld device that applies 3 levels of powerful vibrations (with up to 3200 percussions a minute) to areas of the body.

What that translates to is a very quick and smooth action that will stimulate the tissues to help improve movement and recovery.

Helps relieve muscle soreness and stiffness

Improves range of motion

Promotes circulation

Accelerates warmup and recovery

Lightweight, easy-to-use for self-myofascial release

### Technology Specifications and Features

Powerful high-torque motor featuring Quiet Glide™ technology

3 speed settings deliver up to 3200 percussions per minute

Rechargeable lithium-ion battery (Up to 3 hours of use per charge)

4 interchangeable head attachments

Lightweight (2.5 lbs), ergonomic design

**180-283** Hypervolt Case €49.00 + VAT

Slim and sleek, the Hypervolt Case provides lightweight protection to store and carry your Hypervolt. Custom inlay holds the Hypervolt, 4 head attachments and battery charger.
