Numerous Research studies

Why choose NormaTec?

- Speeds up recovery
- Increases circulation
- Reduces pain & inflammation
- Patented technology for proven results
- Backed by Research studies
- Relied on by 97% of pro teams in the US

NormaTec is the leader in rapid recovery—our systems give a competitive edge to the world's elite athletes, coaches, and trainers. Our goal is to establish recovery as an integral part of every athlete's training, and we feel NormaTec systems are the best way to accomplish that.

The NormaTec PULSE Recovery Systems are dynamic compression devices designed for recovery and rehab. All of our systems use NormaTec's patented PULSE technology to help athletes recover faster between trainings and after performance.

Our systems include a control unit and attachments which go on the legs, arms, or hips.

They use compressed air to massage your limbs,

mobilize fluid, and speed recovery with our patented NormaTec Pulse Massage Pattern.

When you use our systems, you will first experience a pre-inflate cycle, during which the connected attachments are moulded to your exact body shape. The session will then begin by compressing your feet, hands, or upper quad (depending on which attachment you are using). Similar to the kneading and stroking done during a massage, each segment of the attachment will first compress in a pulsing manner and

One such Research Study in the Journal of Athletic Enhancement... *This study was carried out using a 20 minute time in the boots and concluded; "NormaTec was able to significantly decrease blood lactate concentrations compared to other passive recovery methods in just a 20 minute treatment."*

Irish Teams & Athletes using NormaTec

Andrew Conway
Munster & Ireland Rugby

Using the Normatec devices as part of our allied approach to recovery became part of a routine that the players enjoyed & engaged with on a regular basis.

The players ability to be proactive in their own recovery is key & Normatec provides a solution.

Joe O' Connor—Head of S & C
Limerick Senior Hurling

Limerick Hurlers
All Ireland Senior
Hurling Champions 2018

I've been using the NormaTec boots regularly over the past two seasons. I find them great immediately after games and the following day to help remove any stiffness or soreness and freshen the legs before the next training session. I also like to use them in the days prior to a game as a good preparation.

Pádraic Maher—Tipperary
Senior Hurler

We have been using the NormaTec recovery system for the last 2 years and find it as an excellent tool to help reduce muscle soreness – it allows players to recover a lot faster which is needed when the volume of training increases. It only takes about 3 minutes to set up and the portable system is convenient as it can be used whenever you want.

What the teams and athletes are saying

Julie Davis—Head of S&C Armagh Senior Football

"Along with their boots the Sports performance kits are vital to the Armagh GAA players kit bags. We use them before games, pitch and gym for myofascial release along with the bands for Activation. Preparation is key to optimal performance"

Cathal Cregg, Head Strength & Conditioning Officer, Connacht GAA

As Head Strength & Conditioning Officer at Connacht GAA, I recommend our approved supplier "SPORTS PHYSIO SUPPLIES". When dealing with county academy squads reliability and speed of service is of the utmost importance, we have found that "SPORTS PHYSIO SUPPLIES" work to the highest degree of professionalism and quality. We have been supplying our squads with Sports Performance Kit as part of their prehab, warm up and strength training sessions. The kits have played a huge part in helping us implement our programs across the various counties. The kits we use include foam roller, mini bands, Swiss ball and lengths of TheraBand. All of this coming in a small convenient compact bag makes it a vitally important part of our players training and match day kit. The compact kit allows players to carry equipment around in their gear bag.

Ciaran Sloan - Down GAA Senior Strength & Conditioning Coach

The performance kits are very beneficial for use during prehab and activation prior to gym & pitch sessions. The kits can be used at home & when travelling, which allows players to undertake their own individual prep. The sliders & mini bands are used for exercise variation (for example knee flexion posterior chain work), mobilisation & muscle recruitment around the pelvic girdle.

Hypervolt—Recovery

The Hypervolt is a handheld device that applies 3 levels of powerful vibrations (with up to 3200 percussions a minute) to areas of the body.

What that translates to is a very quick & smooth action that will stimulate the tissues to help improve movement and recovery.

- Helps relieve muscle soreness and stiffness
- Improves range of motion
- Promotes circulation
- Accelerates warmup and recovery
- Lightweight, easy-to-use for self-myofascial release

"The Hypervolt is a really useful tool in my recovery arsenal, helping me stay in the best shape possible to train.

As an athlete it's not only the hard miles out on the road or track that get me to the startline, it's also all the work in between.

Recovery is such a key part of my life, using the Hypervolt pre & post training has helped me tackle the rigours hard training has on my body"

HYPERICE

€85

The **Hyperice Knee** is an easy-to-use, portable two-part cryotherapy device. Combining a plush neoprene wrap and ice cell with a patented air-release valve, the Hyperice knee molds the ice to your knee perfectly for an optimal "ice cast" treatment.

Designed to treat and/or prevent: knee pain & inflammation from strains/sprains, ACL/MCL/Meniscus strains or tears, patella tendonitis (jumper's knee), and runner's knee.

Endurance Training/Monitoring

When it comes to accuracy and connectivity, Polar H10 heart rate sensor is the go-to choice. Monitor your heart rate with maximum precision and connect your heart rate to your training equipment. With Polar H10, heart rate monitoring is more accurate than ever.

FEATURES:

Precision - The improved electrodes make Polar H10 the most accurate heart rate sensor in Polar's history.

Connectivity - Polar H10 is compatible with top fitness apps, gym equipment and many other Bluetooth devices.

Updatable - The Polar H10 keeps on improving with OTA software updates.

Suitable for Swimming - The 5 kHz transmission makes sure you can monitor your heart rate even in water.

Built in Memory With Polar Beat - Polar H10 has a built-in memory for heart rate data from one training session. The data can be transferred to Polar Beat, Polar's free fitness and training app.

Comfort - The new Polar Pro chest strap is comfortable to wear with soft textile material, slip-preventing silicone dots and a secure buckle.
